

GroundView Series™

SENTINEL – Portable, Easily Deployed, Surveillance

The AgileMesh GroundView Series SENTINEL™ is a portable, wireless, surveillance solution that features a specially designed camera deployment unit (CDU), one or two ruggedized PTZ surveillance cameras, a CommandMesh™ compliant wireless networking node, an antenna mounting assembly, two antennas and a carrying case.

The SENTINEL is ideal for establishing live, streaming surveillance on all four sides of a major incident where SWAT, hostage negotiators, Intervention specialists or other special tactical units are deployed.

AgileMesh total on-scene, portable surveillance systems enable incident commanders to provide an enhanced level of officer safety, valuable post-incident training tools, incident action evidence gathering and a new level of liability protection. All video transmissions are secure and if one AgileMesh unit is disabled or destroyed other on-scene units continue to operate.

AgileMesh solutions include the proprietary CommandMesh software platform which optimizes video signal processing and communications.
